# Menu items

Most of the menu items and submenus in Frilo software applications are more or less identical. Therefore, we describe them in a separate document. Application-specific menu items are described in the documentation of the respective application.

## File

<b>New</b>	sets up a new structural item. Normally, this is done in the <a href="#">Frilo.Control.Center</a> .
<b>Open</b>	opens an existing item. The projects and items of the project folder used most recently in the <a href="#">Frilo.Control.Center</a> are displayed.
<b>Save</b>	saves the currently active item under the name assigned to it before. If no name was assigned yet, the function "Save as" is activated.
<b>Save as</b>	same function as "Save". The user is required to specify an item name and select a project if not done before.
<b>Save as template</b>	saves a structural item as a template to facilitate the definition of similar items in the future.
<a href="#">Import</a>	imports data such as ASCII data records.
<a href="#">Export</a>	exports data as ASCII data records for instance.
<a href="#">Print</a>	prints system data, results and graphics on the selected printer.
<a href="#">Print preview</a>	The print preview allows the user to check the page layout before printing.

New	Ctrl+N
Open	Ctrl+O
Save	Ctrl+S
Save as ...	
Save as template	
F + L - Explorer	
Import	▶
Export	▶
Print	Ctrl+P
Print Preview	
1. Flight of Stairs DZPos - ( Examples )	
2. B7-001 - ( Localization )	
3. PD01 - ( Localization )	
Exit	Ctrl+Q

<b>History list</b>	recently edited items are listed and can easily be launched per mouse click.
<b>Exit</b>	terminates the application. If you have applied changes to an item and not saved them yet, you are prompted whether to save the changes.

## Edit

<b>Undo</b>	most of the previously performed user actions can be undone via this function.
-------------	--

### Additional application-specific menu items

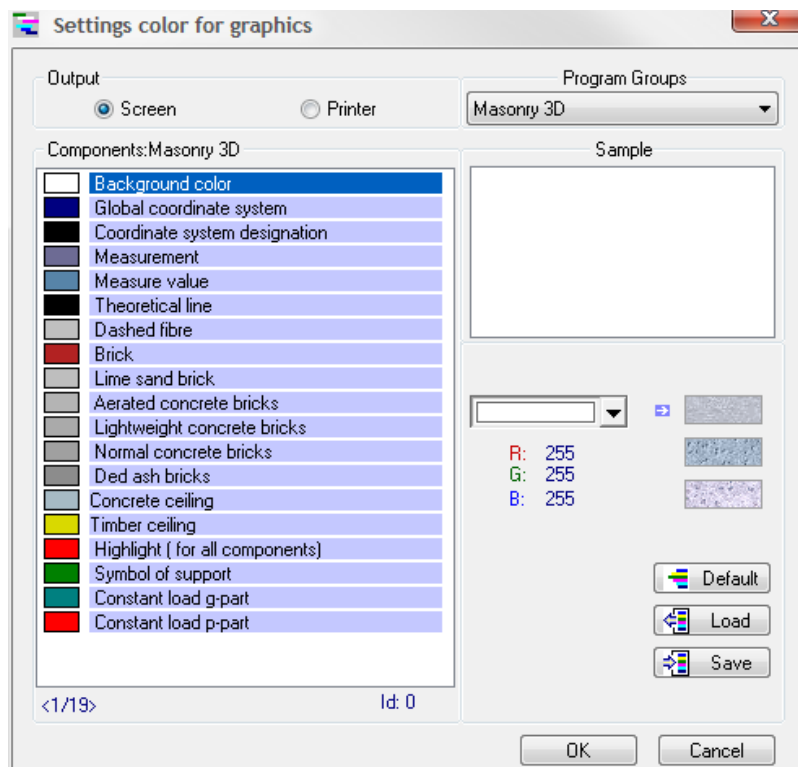

Depending on the application, additional application-specific options are available in this menu. They are described in the corresponding application manual.

## Options

### Color settings

Menu item >>Options >>Colors...

The colors for individual components of the graphic user interface are customizable.

- |                           |   |
|---------------------------|---|
| <b>Output</b>             | the user can select colors for the output on the screen and the printer separately.   |
| <b>Application groups</b> | the selection list displays component-specific ranges for the color setting. The "All" option displays all components of all Frilo applications.  |
| <b>Components</b>         | assigns specific colors to the individual components of the graphic display. Click to the component to which you would like to assign a color. Click to the selection list and select the desired color box  . Select an available colors or define another one via the "Other" button. The new setting becomes active after the relaunch of the Frilo application. |
| <b>Sample</b>             | a miniature of the currently active component in the selected color is displayed in the small preview window to give the user a first indication.   |
| <b>Default</b>            | restores the standard color set selected by the user at any time.   |
| <b>Load</b>               | loads previously saved color settings.  |
| <b>Save</b>               | saves the current color settings in a *.color file for later use. You can load them at any time via the "Load" button.  |

## View

You can display or hide the following elements of the user interface:

- Toolbar
- Status line
- Main menu (FDC selection area)
